Summary

Frontend Developer with 4+ years of experience building enterprise web applications. Delivered Viatris AI Hub using React and Javascript, reducing content update dependency by **60%**, and built vCoach, an AI-powered sales coaching tool that improved conversation readiness by **40%**. Optimized application performance, reducing page load times by **30%** and production issues by **25%**, while building AI-integrated, responsive user interfaces.

Skills

Frontend: HTML5, CSS3, JavaScript, TypeScript, React.js, React Hooks, Redux Toolkit, Zustand, Context API, Node Js

UI & Styling: Material UI, Tailwind CSS, Bootstrap, Responsive Design, Figma, Wireframes

APIs, Testing & Tools: REST APIs, API Integration, FastAPI, Authentication, MSAL, Unit Testing, Cross-Browser Testing, Git, GitHub,

Microsoft Technologies: SPFx, SharePoint REST API, Web Performance, Azure, Azure DevOps, CI/CD

Experience

Viatris **Aug 2022 – Present**
Frontend Developer *Bengaluru, India*

- Developed **Viatris AI Hub**, a centralized platform providing access to enterprise AI tools, learning resources, and services through a single responsive experience, reducing dependency on frontend code changes for content updates by approximately **60%**.
- Built **vCoach**, an AI-powered sales coaching platform using **React.js, TypeScript, and Material UI**, letting reps practice with medicine-specific **AI Doctor** personas via text/voice before real interactions, boosting conversation readiness by **40%**; integrated **FastAPI, Azure AI, and guardrail APIs** to validate prompts and generate rated performance certificates.
- Built **ChatViatris**, an enterprise AI chatbot for IT and HR support, integrating **React.js, Tailwind CSS, REST APIs, Context API, and MSAL** to implement authentication, session management, CRUD workflows, feedback, and responsive chat experiences.
- Delivered **SOP Harmonization**, a document automation solution enabling the SOP compliance team to validate Pfizer SOPs against Viatris standards, reducing manual review time by **70%**.
- Designed a **Feedback Portal** using **React.js and TypeScript** enabling panel admins to review and rate hackathon participants, integrating a **FastAPI** for CRUD operations for feedback submission and rating management.
- Optimized frontend performance across enterprise applications, including reducing **SOP Harmonization** page load time by **30%** through component-level optimizations, and conducted **unit testing, cross-browser testing, and debugging** to reduce production issues by **25%** across releases.

Projects

ChatViatris – Enterprise AI Chatbot

- Designed the chatbot interface in **UX** and translated it into a fully responsive UI using **React.js, Tailwind CSS, and Bootstrap**, building a reusable component library adopted across **500+ users** for IT and HR support queries.
- Built dynamic, state-driven UI components using **React Hooks and Context API** to manage chat sessions, feedback forms, and CRUD workflows, integrating REST APIs to sync data in real time.
- Implemented **MSAL-based authentication** within the React app for secure single sign-on, and optimized component rendering to maintain smooth performance across **1,000+ monthly sessions**.

SOP Harmonization – Enterprise Document Automation

- Designed the application interface and developed a responsive, user-friendly UI using **React.js and CSS** for an application that maps and compares **Pfizer SOP documents against Viatris SOP standards**, focusing on intuitive navigation and clear visual feedback for the SOP compliance team.
- Created reusable React components to handle document path validation and folder creation workflows, integrating **SharePoint REST APIs** to reflect real-time document status directly in the UI across **150+ documents**.
- Implemented client-side form validation, loading states, and error handling to ensure a smooth user experience while backend Python and Azure AI services processed document comparisons and generated Excel reports.

Education

Dayananda Sagar College of Engineering **August 2018 – June 2022**
Bachelor of Engineering in Electronics and Telecommunication *Bengaluru, India*
